# Enhanced Value Stream Mapping ...

FasTrack VSM features a complete icon set - based on Mike Rother & John Shook's well-reknowned book "Learning to See". While not intended to replace traditional Value Stream Mapping techniques - this tool reduces time spent transferring the data into electronic format. This allows you to quickly and effectively share the data you have gathered on your current state - and to share your vision for the future state.

## Features:

- Drag and drop icons and data sets into your workspace to create both current and future value stream maps
- All text is editable
- Datasets are preconfigured for quicker and more efficient transfer of data
- 'Snap & glue' feature for easier functionality
- Compatible with Visio versions 5.0, 2000, and 2002

Compare other similar products at a cost of \$420 annually!

## Requirements:

- Microsoft Visio versions 5.0, 2000, or 2002

## Pricing:

- \$249 CDN (plus applicable taxes). This is a one time fee and includes email support and any upgrades made within 2 years of purchase.

FasTrack is an awesome tool! Shifting from pencil and paper using FasTrack was like moving from a horse & cart process to super sonic speed. The ability to create a professional VSM was made easy, fun, and flexible by clicking and dragging icons to the page. FasTrack is easy to use and most important easily understood by all. After you've walked the process and are back in your office FasTrack and computer quickly become your best friend. FasTrack VSM is a big part of our "Lean Initiative".
